

MDD
HEAVY INDUSTRIES

CAPABILITY STATEMENT

INVEST

IN YOUR SUCCESS

MDD Heavy Industries provide a broad range of repair and maintenance options to suit any operation.

Working across earthmoving, civil, mining and agriculture industries within the Central & North Queensland region, we are proud of the reputation we have built on delivering reliable, high-quality and timely solutions that businesses can depend on.

We offer a comprehensive range of services, including a well-appointed workshop facility to accommodate machine repairs, machine component and hydraulic cylinder overhauls, breakdown response, on-site and off-site labour solutions, mobile hose services, a fully equipped hydraulic hose manufacture and hose & coupling supply facility, abrasive blasting and industrial coatings.

MDD Heavy Industries can provide end-to-end solutions tailored to suit your needs and to maintain your assets to the highest possible standards.

EXPERIENCE:

Over 70+ years combined experience and 30+ years Caterpillar dealership experience

CLIENT RELATIONSHIPS:

Strong connections in earthmoving, civil, mining and agriculture industries

PROFESSIONAL:

Qualified diesel fitters and tradespeople on-site or in the workshop

COMMUNITY FOCUSED:

Supporting the community that supports us

OUR STORY

Founded in 2015 by Matt Auhl and Jack Deller, MDD Heavy Industries is built on a strong foundation of quality, reliability, and hands-on service.

From humble beginnings, we have grown steadily to become a recognised and trusted provider of earthmoving equipment maintenance and solutions. Our growth has been driven by our unwavering commitment to excellence, attention to detail, and a deep understanding of the industries we serve.

Over the years, we have developed a reputation for delivering dependable, high-quality workmanship and responsive support, even in the most demanding environments. Our capabilities span everything from component and hydraulic cylinder repairs to full machine rebuilds, servicing and general maintenance, diagnostics, and on-site breakdown support.

We proudly support a diverse client base - from local small businesses and contractors to major mining companies and tier-one mining houses - delivering tailored solutions that meet their unique operational needs.

Our clients rely on us for our technical expertise, flexibility, integrity, and ability to get the job done right the first time.

As we continue to grow, we remain focused on building lasting relationships, investing in our people and capabilities and consistently delivering outcomes that exceed expectations.

OUR SERVICES

Comprehensive
**repair and
maintenance
solutions** for projects
of all sizes, from
minor oil leaks to
complex mine site
builds.

General Repair and Maintenance

Machine Rebuilds

Component Overhauls

Hydraulic Cylinder Overhaul

Abrasive Blasting & Protective Coatings

Hydraulic Hose Services

General Repair and Maintenance

From minor oil leaks to mine site regulation specific builds, MDD Heavy Industries provides complete general repair and maintenance for all jobs big and small.

From machine preventative maintenance servicing to customer-derived defect rectification, our highly skilled, experienced team and comprehensive facility are well equipped to handle a broad spectrum of repair and maintenance services.

Machine Rebuilds

We offer **end-to-end machine rebuilds** either tailored to OEM Certified zero-hour scopes or customised to suit client-specific requirements including component and machine history, health and budget constraints.

Our reputation is built on delivering results - with machines returned on time, within budget, and operating with proven reliability.

Component Overhauls

Our **component rebuild and repair** solutions provide our clients with the flexibility to obtain a full life, a strategic life extension or a basic re-seal.

Dedicated teardown and assembly areas assist us to deliver consistent quality, while controlled inspection, and precision assembly ensures that each overhaul meets our clients operational and reliability expectations.

Hydraulic Cylinder Overhaul

With a high-capacity hydraulic cylinder bench (40,000 ft-lb torque), pressure testing capabilities up to 4000psi, and a bench length of 6 metres, MDD Heavy Industries is equipped to carry out **seamless repairs to cylinders** of varied sizes.

Each repair is executed with precision and verified through rigorous post-repair pressure testing to ensure dependable performance in the field.

Abrasive Blasting & Protective Coatings

Our in-house **blasting and painting** operations are conducted in separate onsite facilities with blasting processes ensuring surfaces are adequately prepared for long lasting adhesion and corrosion resistance.

The presence of a Truflow paint extraction system allows us to deliver premium-grade coatings, minimising contamination and maximising paint finish quality, durability and longevity.

Where applicable, quality assurance testing and supporting documentation are undertaken to satisfy paint application specification processes.

Hydraulic Hose Services

We maintain a comprehensive inventory of **world class hydraulic hoses**, couplings, and fittings, enabling rapid turnaround and helping to minimise machine downtime. To further support our clients on-site, we operate a fully equipped mobile hose truck, providing prompt hose replacement and breakdown assistance when it's needed most.

FIELD SUPPORT SERVICES

Whether it's breakdown response, scheduled maintenance, diagnostics or straight labour support for crew deficits, we deliver efficient on-site solutions to minimise downtime and keep operations running smoothly.

With site compliant field service vehicles and a commitment to safety and quality, MDD Heavy Industries can respond promptly to field service requests, ensuring minimal machine downtime and maximum productivity for our clients.

Our trade qualified technicians provide **reliable field service support** for a wide range of heavy equipment.

OUR EXPERTS

Each and every member of the MDD Heavy Industries team, from our apprentices to our technicians, are **highly skilled, passionate individuals** who are dedicated to providing a great service.

Our trade-qualified technicians have extensive experience with machine rebuilds, component overhauls, diagnostic testing and preventative equipment maintenance.

The MDD Heavy Industries team will ensure your equipment operates as efficiently as possible by performing preventative maintenance and urgent repair services.
